PROFILE

Data-driven Product Manager and Business Analyst with over 7+ years of experience scaling digital platforms across the Fintech, EdTech, and telecommunications sectors. Currently pursuing a Master of Science in Strategic Information Systems Management at Stockholm University, combining advanced academic frameworks with practical expertise in the end-to-end product lifecycle. Proven track record of directing cross-functional teams, facilitating global requirements engineering, and optimizing enterprise workflows to reduce operational costs and drive high user adoption. Adept at bridging business strategy and technical execution to deliver measurable efficiency and revenue gains.

CORE COMPETENCY

Product & Project Management	Product Strategy, Roadmap Planning, Agile Operations, End-to-End Delivery, Cross-Functional Leadership.
Business Analysis	Requirements Engineering, Stakeholder Management, Process Optimization, Technical Documentation, Workflow Architecture
Technical & Data Skills	System Design, Data Modeling, Workflow Automation, SQL, Business Intelligence, API Integration, Compliance Tracking

WORK EXPERIENCE

Product Manager II

04/2025 – 08/2026

NEXT Ventures - Dhaka, Bangladesh

- **Product Strategy:** Managed a 20-person cross-functional squad from discovery to delivery. Presented financial models to the CEO and CFO to align roadmaps with revenue goals.
- **Product Development:** Led the Dashboard V3 rebuild, achieving 95% user adoption and reducing related support tickets from 25% to 8%.
- **System Design & Security:** Designed a 2-provider KYC system (Veriff, SumSub) and a biometric Ban Prevention System. Updated 2FA architecture with OTP recovery, dropping company-wide tickets by 18.5%.
- **Workflow Engineering:** Created self-service account management workflows (pauses, deletions) with audit trails, decreasing targeted quarterly tickets by 80%.
- **Data Analysis & Launches:** Shipped Google SSO and Risk Cards. Prioritized Google authentication after data showed 84% of signups used standard email.
- **Agile Operations:** Built n8n API workflows integrating Jira and ClickUp, cutting manual coordination by 40%. Implemented the first OKR and KPI framework.
- **Requirements Engineering:** Defined technical requirements for a notification system, driving a 35% engagement increase across 20,000 users. Received the Product Excellence Award.

Business Analyst

07/2022 – 03/2025

Save the Children International (TecHHub) - Dhaka, Bangladesh

- **Requirements Engineering:** Consolidated requirements across 7 countries into unified product specifications for 8 IT solutions, managing delivery within 15-person cross-functional teams.
- **Product Roadmaps & LMS:** Managed roadmaps for 3 EdTech platforms with custom CMS backends: Learning Tree App (deployed in 5 countries for 1,500 children, 100 teachers, 50 caregivers), Education Cannot Wait Web App (400 families, 70 teachers, 50 caregivers), and CSKC LMS (15 garments factories, 500 families).
- **Enterprise Applications:** Directed the development lifecycle of workplace tools with 100% employee adoption: OnDesk (mobile app with AI voice support and asset tracking) and SOMS (skills assessment app integrated with HR platforms).
- **System Design & Compliance:** Designed the SEAL Initiative compliance portal and Audit Tracker, replacing fragmented data with a centralized, real-time child-rights tracking system.
- **Workflow Architecture:** Delivered a comprehensive job portal and Applicant Tracking System (ATS) for Handicap International, supporting the complete hiring workflow and a web backend for HR administrators.

Business Operations Analyst **11/2019 – 11/2021**
Loosely Coupled Technologies - Dhaka, Bangladesh

- **Process Optimization: Streamlined** data-integration and software-design workflows across client projects, achieving a 15% reduction in overall operational costs.
- **Data Modeling & Business Intelligence:** Extracted and modeled data using Microsoft SQL Server on Azure to build executive dashboards and operational reports, driving day-to-day business decisions.
- **Technical Documentation:** Authored comprehensive user manuals and onboarding documentation to standardize platform knowledge, successfully decreasing user support ticket volume by 20%.

Software Developer **08/2019 – 11/2019**
Loosely Coupled Technologies - Dhaka, Bangladesh

- **Software Development & Deployment:** Built and deployed enterprise software solutions for major telecommunications clients (Robi, Grameenphone), scaling applications to successfully support millions of end-users.
- **Application Engineering & Data Integration:** Developed a weather prediction application for the Bangladesh Meteorological Department. Integrated real-time data feeds to forecast street-level traffic patterns and optimize local routing.

EDUCATION

Master of Science (MSc), Strategic Information Systems Management **08/2026 - Present**
Stockholm University, Stockholm, Sweden

Related Courses: Data Warehousing, Big Data with NoSQL Databases, Advanced Requirements Engineering of IT-systems, Enterprise Computing and ERP Systems, System Integration of IT Business Information Systems, Decision Making with Business Intelligence and Data-driven Analysis
